TITLE: Hunting with Crossbows

The Problem:

The relaxing of restrictions allowing use of, crossbows for deer hunting, in the traditional archery deer season would have a detrimental affect on the archery season length and harvest.

A separate crossbow license and deer hunting season would allow tracking and control of harvest numbers and harvest quotas. This season of a specified length could run concurrent with the traditional archery season.

BE IT RESOLVED, That the Conservation Congress at its annual convention held on May 9th, 10th and 11th at Eau Claire, Wisconsin will work with the Department of Natural Resources to implement a separate crossbow license and a separate crossbow deer hunting season.
